

Smart 25+

Smart BOX Solutions

Smart BOX system is developed for easy and quick construction. The Smart BOX modules are made and pre-constructed under secure and controlled environment. Base constructions are made of metal for convenient transportation and reuse. All materials used for modules meet strict EU standards. All modules can be united with each other. This allows to construct various buildings from one-room summerhouses to all sorts of apartment houses, hotels etc.

Smart 25+

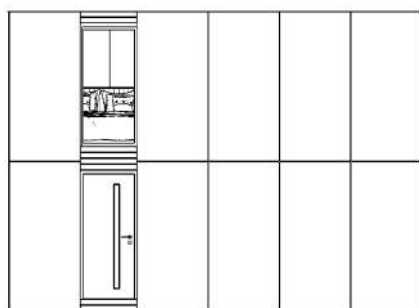

Smart 25+ is an updated version of SMARTBOX's family standard module. Smart 25+ offers all conveniences in a small space – including fully equipped and high quality kitchen, sanitary room, built-in wardrobe and storerooms. Lifted height of the house, approximately 4.7 meters, makes the module extraordinarily spacious with excellent lighting conditions. On the second floor there is a 10 m² loft-type bedroom. Full-height window at the living room gives easy access to outside or to the terrass. This stylish two-floored module is very open spaced with a functional living room.
